--O--

BUREAU OF THE CENSUS

William L. Austin, Director

--O--

This is the third of the final series of reports on retail trade presenting the results of the 1933 Census of American Business. The statistics were collected in 1934 by a field canvass of retail stores in every State, city and county in the United States, with funds provided by the Federal Civil Works Administration. They cover the operations of retailers during the year 1933.

The reports are prepared under the supervision of Fred A. Gosnell, Chief Statistician for the Census of American Business, by John Guernsey, in charge of Retail Distribution. Assistance in the preparation of statistical data was rendered by William A. Ruff, Assistant Chief Statistician, and James O. Reid, Retail Assistant.

RETAIL CENSUS REPORTS - FINAL SERIES: 1933

ARRANGEMENT AND CONTENTS OF VOLUMES

Volume 1 - U. S. Summary. Contains a general description of the Retail Census for 1933, definitions of terms and classifications, and U. S. Summaries, by kinds of business and by States, of Tables 1 to 6 and 10 to 12 contained in volumes listed below. It also includes tables providing an analysis of retail sales (Table 7), a summary of wholesalers' sales at retail (Table 8) and an analysis of receipts of service establishments (Table 9).

A separate section presents an analysis by size of city of stores and sales, classified into 11 kind-of-business groups. This analysis is carried through for each State and geographic division and summarized for the United States as a whole.

Comparisons with 1929 of the principal data by kinds of business are contained in a special table (Table A), which is presented separately for each State and in summary for the United States.

A chain-store section contains a summary of all known retail chains, classified by kinds of business, showing units, sales, stocks, employees and payroll in stores and in central office, reported expenses in stores and in central offices and the proportion prorated to stores.

Volume 2 - General Statistics, by States and 13 largest cities, by kinds of business (Table 1). Employment, by States and 13 largest cities, by kinds of business (Table 2).

Volume 3 - County Totals. Contains summary of stores, sales, proprietors, full-time employees and payroll for each city, town and county throughout the United States (Table 11), and summary by 52 kinds of business for each city of more than 50,000 population (Table 12).

Volume 4 - Analysis of Stores by Date of Establishment, showing for each State and for each kind of business the number and sales of stores established in 1933 (by quarters), those established between 1929 and 1933, and those in operation in 1933 which were also in operation in 1929 (Table 6).

Volume 5 - Credit Business. Contains analysis for each State of stores and sales, by kinds of business, classified to show credit-granting stores separate from all-cash stores (Table 5).

Volume 6 - Chains and Independents and other types of operation - State totals, and more detailed analyses for 18 kinds of business in which chains are a more or less important factor (Table 3).

Volume 7 - Stores and Sales by Size of Business Shows stores and sales by kinds of business, classified in 10 size groups, by States (Table 4).

Volume 8 - Retail Distribution, 1933, by Areas. Stores and sales by 11 business groups, for States, counties and cities (Table 10).

Special Reports by Trades. Food Retailing, Variety-Store Chains, Department-Store Chains, Drug Retailing (including drug-store chains), Retail Employment and Wages, Automotive Retailing, Apparel Retailing and others. (Separate reports have been issued covering the above-named subjects; they are not brought together in a single volume).

CENSUS OF AMERICAN BUSINESS

RETAIL DISTRIBUTION
VOLUME III - COUNTY AND CITY SUMMARIES

This volume, which presents summary data by areas concerning the number of stores, amount of sales, number of proprietors, average number of full-time employees, the total payroll and, separately, the amount of part-time payroll, is in two parts.

The first consists of Table 11 with the above described data for each State, each county, and each city of 2,500 or greater population.

The second part consists of Table 12 which lists in alphabetical order all cities of more than 50,000 population and shows for each city all of the above described data analyzed further by 52 kinds of business.

Because of the number of disclosures which would result in any attempt to present the same detail by kinds of business in the smaller cities a grouping of stores by 11 business groups for cities of 2,500 to 50,000 population has been made available in Volume VIII. This table, however, contains data only for stores and sales.

The population figures, given in Table 11 for each city, are as of April 1, 1930. Although the Bureau of the Census has prepared estimates of population in cities of 10,000 and over, as of July 1, 1933, the figures for 1930 have been used here because the table includes also cities and incorporated places with population of 2,500 to 10,000.

Sales

Sales figures given in Tables 11 and 12 represent total net sales of retail stores in each designated area during the year 1933. They are not to be confused with total retail purchases of the population of such areas. Many cities attract to their stores a considerable volume of retail business from residents of other communities; likewise the residents of few, if any, communities limit their entire purchases to local stores. It is unsound, therefore, to use the total sales of the stores of any given area as the basis for computing so-called per-capita sales of such area.

Proprietors

The number of proprietors is the number of owners or partners of unincorporated businesses, and of the adult members of their families actively engaged in the operation of their stores. The great majority of proprietors are found in the very small stores with less than \$10,000 of annual sales. Of the total of 1,574,341 proprietors about two-thirds or 1,089,987 are proprietors of the 982,193 stores whose sales volume is less than \$10,000 per year. About 437,000 proprietors operate the 458,384 stores whose sales volume is between \$10,000 and \$50,000. In all stores of less than \$50,000 of annual volume there are 1,527,659 active proprietors and 1,327,367 full-time employees. The aggregate sales volume of these 1,440,577 stores is \$13,047,557,000.

Employees

Full-time employees as presented in Tables 11 and 12 represent the average number of employees working full-time, computed by averaging the twelve monthly employment figures reported to the Census. The monthly figures in detail may be found in Table 2, contained in Volume II of this final series of retail reports. No figures for part-time employment are given herein. They also may be found in Table 2 of Volume II.

Payroll

Payroll is presented in total and separately for part-time employees. The difference between total and part-time payroll is full-time payroll. The average compensation of full-time employees can be determined by dividing the full-time payroll by the average number of full-time employees. This, of course, is merely an approximation to the true annual compensation, because payroll represents an actual aggregate of compensation paid in the course of the year, whereas the average number of employees is not entirely identical with a true average of full man-months of employment.

In comparing average compensation of full-time employees by areas or by kinds of business it should be further noted that this figure is influenced by the composition of the group of full-time employees. For incorporated business the count of employees and the payroll include the higher paid executives, in addition to other employees, whereas for stores which happen to be unincorporated employment does not include the proprietors and firm members, who correspond in general to the executives of corporate businesses, nor does payroll include any allowance for the compensation of these proprietors. In comparisons by areas particular attention should be paid to the difference in the proportion of chains.

An analysis of retail distribution for each State and separately for 18 kinds of business, by types of operation, is to be found in Volume VI (Table 3).

Terms and Classifications

The various terms and classifications used throughout this volume are described in Chapter 2 of the U. S. Summary, Volume I of this final series.

Comparative Figures for 1929

Data for 1929 comparable to the data presented in this report are available in the reports of the 1929 Retail Census, contained in summary in part 1, and by States in parts 2 and 3 of Distribution, Volume I (Fifteenth Census of the United States: 1930).

Adjustments

After State and national totals were determined and published, certain errors of a minor nature were found which are duly reflected in the city and county figures in this Volume. They affect areas in Missouri, Ohio, Oklahoma, Pennsylvania, Texas, and Washington, as noted in the tables for those States. No adjustment has been made, however, in State or national totals, as the net effect on sales of all changes would be an addition of only \$5,686,000.

RETAIL DISTRIBUTION: 1933

UNITED STATES SUMMARY.—NUMBER OF STORES, SALES, PERSONNEL, PAY ROLL, AND EXPENSES, BY KINDS OF BUSINESS

(Sales, pay roll, and expenses expressed in thousands of dollars)

United States Summary

1/ A number of small stores combining the sale of confectionery, tobacco products, newspapers and magazines, classified in 1929 as news stands, are described in the 1933 Census as confectionery stores, either by reason of a change in the character of their business or by local instructions to enumerators. Because of the limited nature of the information reported, it is impossible to make an accurate differentiation between these two classifications in the New York City boroughs.
